

Provisioning Solution for Exchange Resource Forests

Discover why leading enterprises choose **ProvisorERF™**

Organizations wanting to deploy a centralized Exchange solution but needing separate or multiple Active Directory forests due to security or operational requirements often utilize an Exchange Resource Forest. While effective, the process for setting up the necessary accounts and permissions is both error prone and time consuming.

ProvisorERF ensures you can easily update directories, quickly provision new accounts, ensure security between accounts, and automate many of the time-consuming and tedious tasks associated with an Exchange Resource Forest.

Developed to support Microsoft's .NET strategy, ProvisorERF uses an XML-based platform that can be easily customized to meet specific operational requirements.

ProvisorERF simplifies the setup and management of Exchange mailboxes and Active Directory placeholder accounts in an Exchange Resource Forest, as well as giving mailbox rights to the associated external AD account. Single and multiple external AD forests are supported.

Speed up delivery time and reduce ongoing costs – it all adds up to a better bottom-line. Built on abrideans' award winning platform, Provisor, you can be assured of quality and ease of use.

ProvisorERF Supports:

ProvisorERF Empowers you to:

- Automate manual processes
- Improve security
- Reduce Help Desk calls
- Rapidly deploy new accounts
- Give control to your users through delegated management
- Quickly deliver on provisioning requests

ProvisorERF uses a powerful provisioning engine and an easy-to-use interface that quickly becomes a key corporate asset. The Provisor engine acts as a transaction controller that intelligently automates and streamlines the common tasks associated with provisioning and managing enterprise applications according to defined business rules. These tasks include:

- Initial set-up (identity creation)
- Privilege Assignment (access limits and security settings)
- Usage growth and policy management
- Manage Security Settings
- Usage metering and reporting
- User management

Since 2000, Abridean has been providing superior provisioning products to some of the top hosted Exchange providers. Call us for more information today. 1.877 .520 .4277
